

Constellation

STRATEGIC ACCOUNT OS

CONSTELLATION CRM

Platform Overview

Constellation connects account planning, signal intelligence, seller action, and proposal packaging in one operating workflow.

PLAN

Account OS

Account plans, relationship maps, white space, competitive context, and next moves stay connected to CRM data.

ACT

Guided Plays

Signals, campaigns, sequences, and seller tasks convert account strategy into coordinated action.

PACKAGE

Proposal Studio

Approved narrative, pricing, references, ROI, and implementation context become customer-ready modules.

Why it matters

- **Less context chasing**
Plans, notes, decks, CRM records, and AI prompts stop living in separate motions.
- **Faster signal response**
Market changes become visible triggers for timely account owner action.
- **Cleaner leadership visibility**
Executives see whether strategic account work is moving pipeline.
- **Reusable proposal assets**
The account strategy carries through to customer-facing documents.
