

Constellation

STRATEGIC ACCOUNT OS

CONSTELLATION CRM

Platform Overview

Constellation turns CRM from a passive record of activity into a guided operating system for strategic account execution.

PLAN

Account OS

Account plans, relationship maps, white space, competitive context, and next moves stay connected to CRM data.

ACT

Guided Plays

Signals, campaigns, sequences, and seller tasks convert strategy into coordinated action.

PACKAGE

Proposal Studio

Approved narrative, pricing, references, ROI, and implementation context become customer-ready modules.

Why it matters

- Less context chasing across spreadsheets, decks, CRM notes, and isolated AI prompts.
- Faster follow-through when account signals create a timely reason to engage.
- Better leadership visibility into whether strategic account work is producing pipeline movement.
- Reusable proposal assets that carry the account strategy into customer-facing documents.
