

RECOMMENDED ROLLOUT

Pilot Success Plan

A focused Constellation pilot can prove strategic account execution value without overloading the field team.

1

Activate accounts

Import target accounts, contacts, stages, current pursuits, and priority tasks.

2

Configure operating views

Set Command Center filters for leadership, managers, and account owners.

3

Launch signal plays

Enable Cognito triggers and connect them to campaigns, sequences, and next steps.

4

Generate proposals

Use real stock modules, pricing, references, and impact analysis for customer-ready output.

5

Review outcomes

Measure adoption, signal response speed, proposal cycle time, and strategic pipeline movement.
